About OST Global Solutions

OST GLOBAL SOLUTIONS

WE'VE WON OUR CLIENTS OVER \$26 BILLION IN FUNDED GOVERNMENT CONTRACTS SINCE 2005

BUSINESS DEVELOPMENT, CAPTURE, AND PROPOSAL CONSULTING

**SUPPORT FOR R&D
BUSINESSES FOCUSED ON
SBIR/STTR**

- REGISTERED APPRENTICESHIP IN GOVERNMENT BUSINESS DEVELOPMENT
- ACCEPT VETERANS ADMINISTRATION (VA) FUNDING
- FULL BD LIFECYCLE TRAINING

**Industrial
Revolution: 25%
Productivity Increase**

AI Transformation: Estimated 30% - 80% Productivity Increase

- PwC claims AI could add nearly \$16 trillion to the world economy by 2030.
- McKinsey predicts \$13 trillion in the same time.

frame.

Understanding AI in the Context of Government BD

- Many inventions in the past were initially regarded as cheating but now are an integral part of our lives: spell check, calculator, Grammarly, etc.
- Leveraging AI as a collaborative partner is no longer optional to keep pace with the industry and remain relevant and in-demand.
 - AI is rapidly becoming the standard in Government BD, with the Association of Proposal Management Professionals (APMP) leading the charge with AI-focused events and conferences.
 - Government source selection is embracing AI, adding new scrutiny to evaluation of compliant and compelling offers.
 - Acqbot expedites contract writing and the federal acquisition process.
 - GSAi is a custom AI chatbot designed to boost productivity among GSA's employees by analyzing contract and procurement data

▶ **Future-proof your career to ensure you remain valuable as the field evolves.**

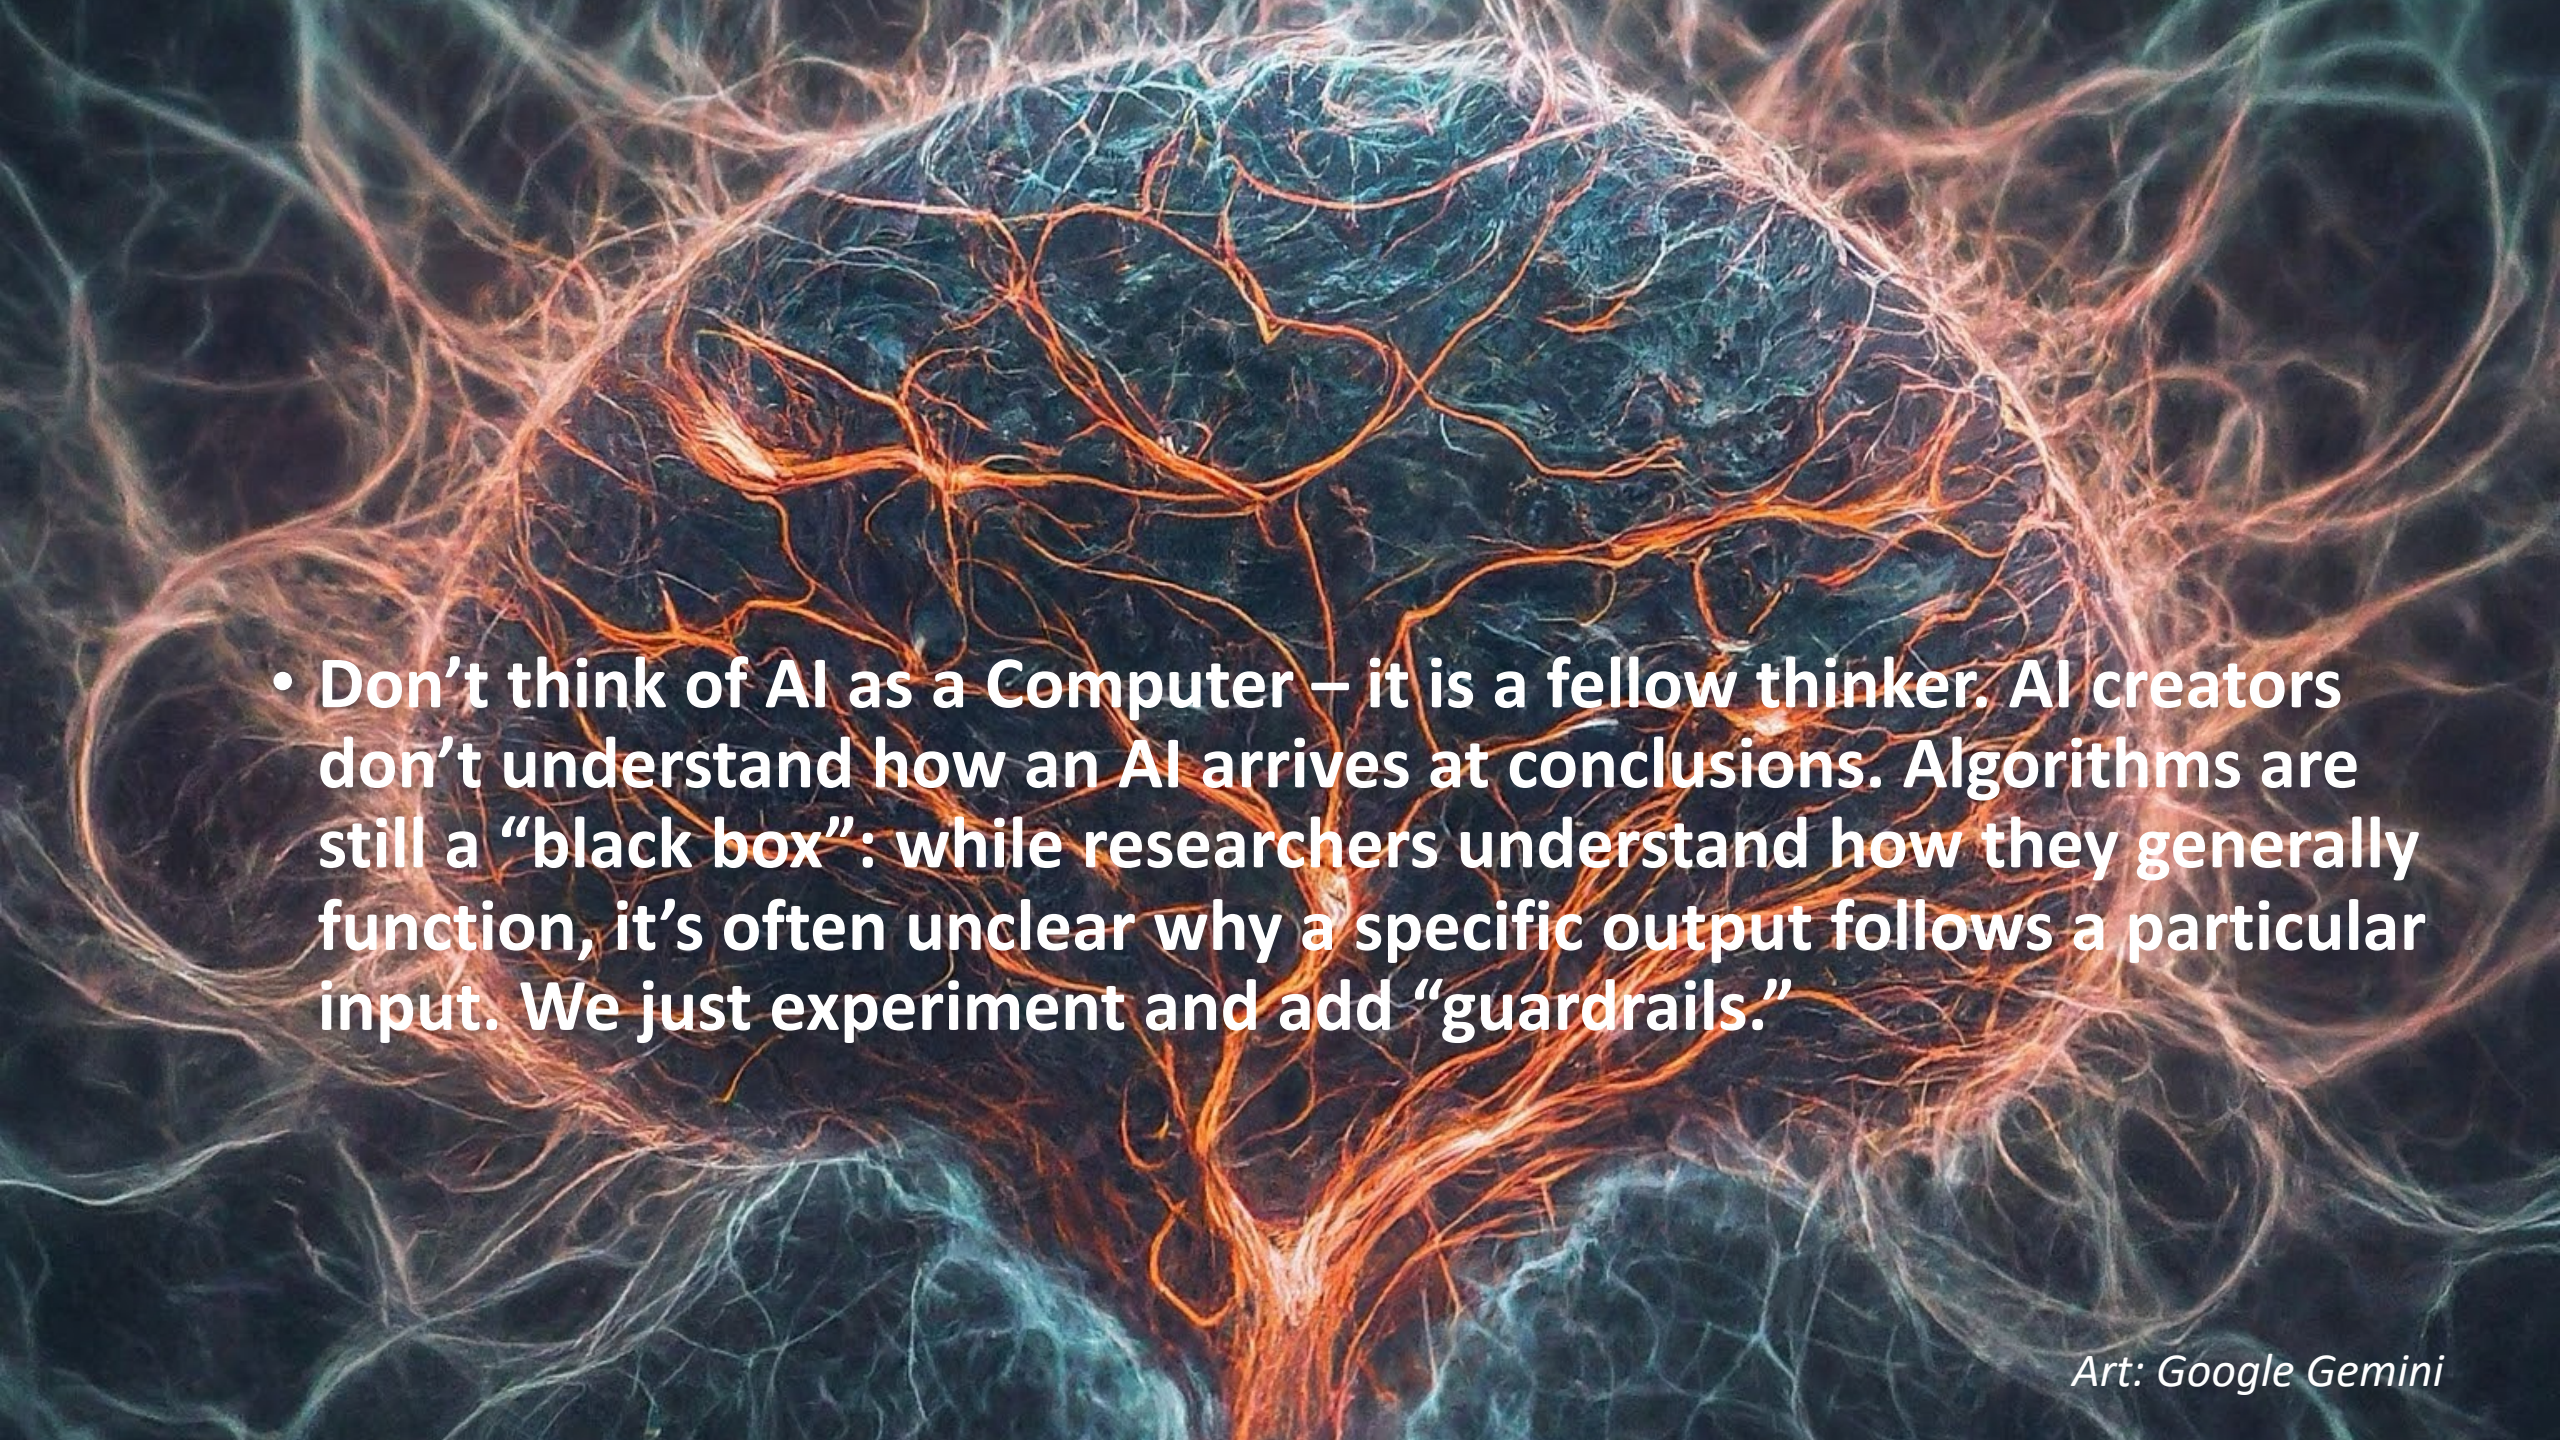

AI Advantages in Government BD

- Provides strategic advantage in analyzing vast amounts of opportunity, pursuit, proposal, past performance, resume, and financial data.
- Allows precision by providing insights into patterns and trends, and offers predictive analytics results that may escape the human eye.
- Currently increases productivity at least 30%, and results in 20% higher win rates and 25% labor cost savings.
- Helps identify risks and devise proactive mitigation strategies that save time and resources.

▶ **AI will not take your job, but another professional who masterfully uses AI will – be the one who remains.**

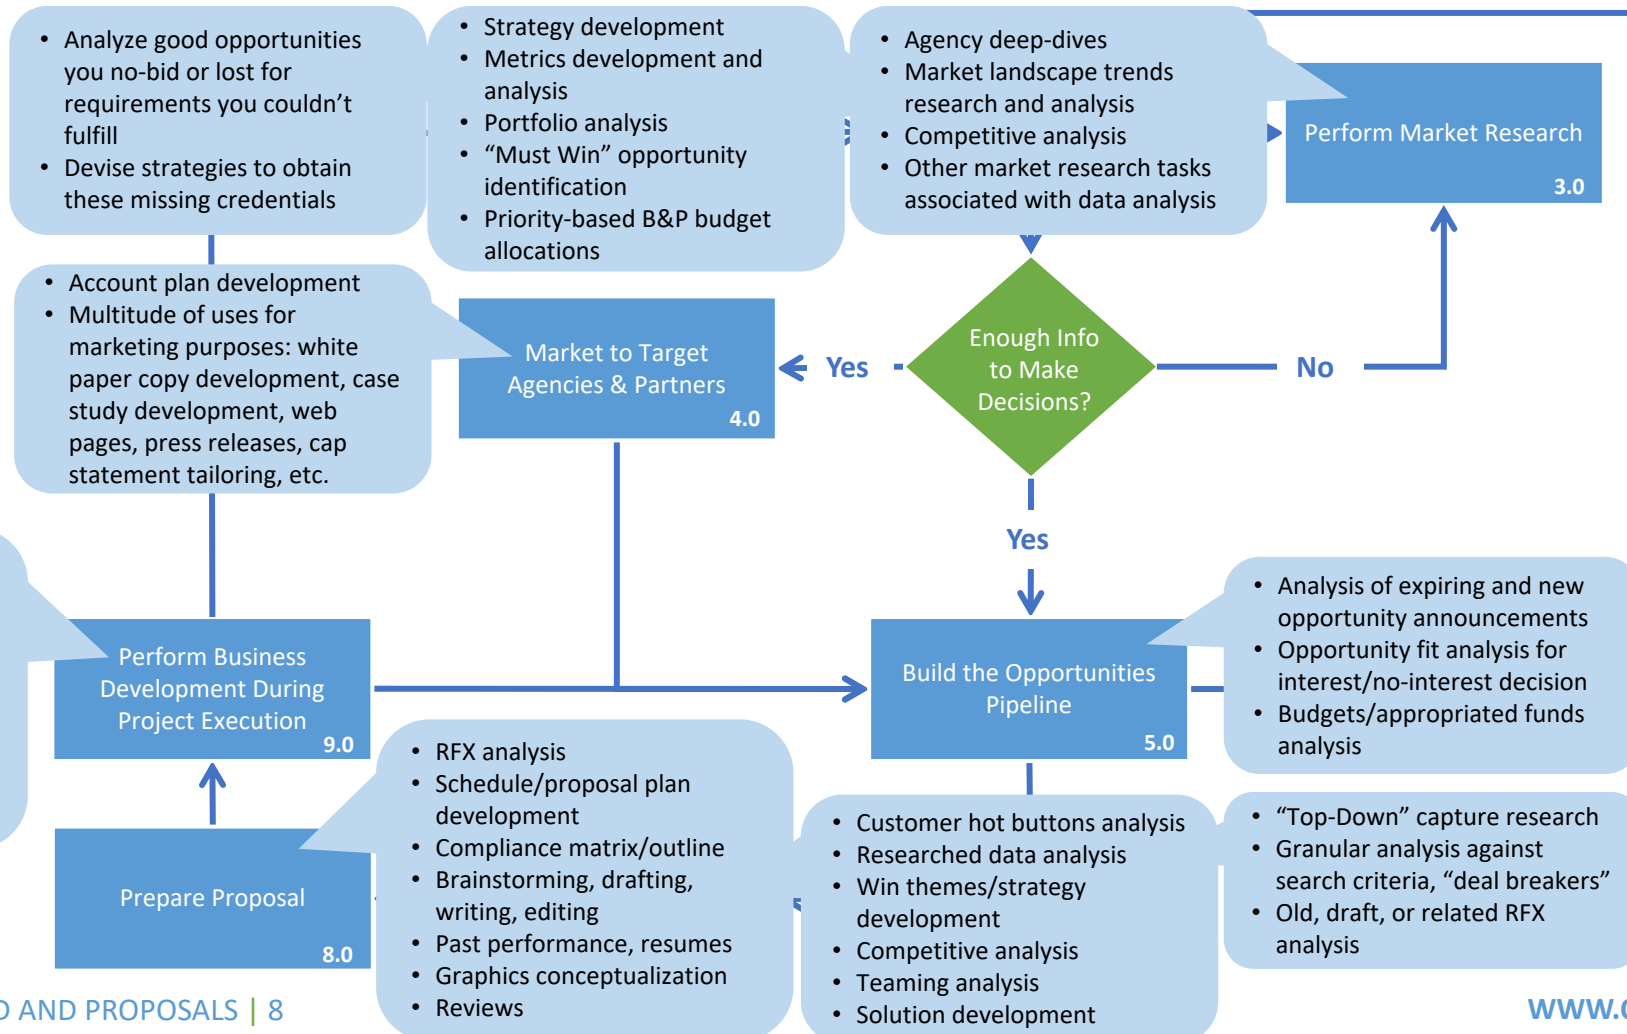

- 
- A glowing brain with orange and blue neural connections, set against a dark background. The brain is the central focus, with a dense network of fibers extending from it. The colors are vibrant and ethereal, giving it a futuristic or digital appearance.
- **Don't think of AI as a Computer – it is a fellow thinker. AI creators don't understand how an AI arrives at conclusions. Algorithms are still a “black box”:** while researchers understand how they generally function, it's often unclear why a specific output follows a particular input. We just experiment and add “guardrails.”

AI Fundamentals: AI in Government BD Lifecycle (2)

OST GLOBAL SOLUTIONS

• AI is transforming government BD, capture, and proposal development workloads in every step of the BD lifecycle.

Challenge

- Many organizations are not leveraging AI even if they are at the Level 3 maturity “Defined,” or above
- Much of the useful data that could enhance AI-enhanced employee productivity is kept across multiple employee’s computers and cloud spaces and hasn’t been consolidated it into one organized Library
- Competitive opportunities are missed

BUSINESS DEVELOPMENT AND AI INTEGRATION MATURITY LEVELS

6 DIFFERENTIATED	COMPETITIVE DIFFERENTIATION DRIVES LIFETIME CLIENT BASE. AI AUTOMATION RESULTS IN MAXIMUM VOLUME AND QUALITY.
5 OPTIMIZED	STANDARD BD PROCESSES ARE IMPROVED USING DATA DRIVEN BY FIRM, GROUP, AND INDIVIDUAL GOALS. AI AUTOMATION REACHED.
4 QUANTITATIVELY MANAGED	STANDARD BD PROCESS IMPLEMENTED THROUGHOUT THE FIRM, MEASURING WHAT MATTERS. AI EMBEDDED IN STRATEGY.
3 DEFINED	STANDARDIZED BD PROCESS IN POCKETS WITHOUT ORGANIZATIONWIDE PROCESS IMPROVEMENTS. AI BECOMES OPERATIONAL.
2 REACTIVE	CHAOTIC AND TACTICAL, RESPONDING BASED ON INDIVIDUAL PERFORMANCE. EXPERIMENTATION WITH MAINSTREAM AI.
1 AD HOC	UNORGANIZED. AUTOMATICALLY AT THIS MATURITY LEVEL. INTERESTED IN AI.

Traditional Boilerplate Reuse Process Is Fraught With Issues

OST GLOBAL SOLUTIONS

1

**TROUBLES WITH LOCATING
THE RIGHT DATA**

2

**DROWNING IN IRRELEVANT
INFORMATION WHILE DIGGING
THROUGH MOUNTAINS OF
DATA**

3

**IMPORTING STALE MATERIALS
TO THE NEW PROPOSAL WHILE
FAILING TO FORMULATE A
UNIQUE NEW SOLUTION**

4

**FAILING TO WEED OUT
LEFTOVER ARTIFACTS THAT
MAY BE AS EGREGIOUS AS
ANOTHER CUSTOMER'S NAME**

AI Equipped with RAG Enables AI-Augmented Proposal Libraries

OST GLOBAL SOLUTIONS

- **Retrieval Augmented Generation (RAG):** An algorithm that helps you get and use your company data without the risk and high cost of training a local language model.
- You want your data in a private vector database and not available for the LLM to use for training, so that your data stays secure.
- Retain all proposal artifacts in a library to help AI search and retrieve information efficiently
 - Classify your data into groups and classes like Management Plan, Resume, etc.
 - Tag Your Data: Master's, Top Secret, U.S. Navy, etc.

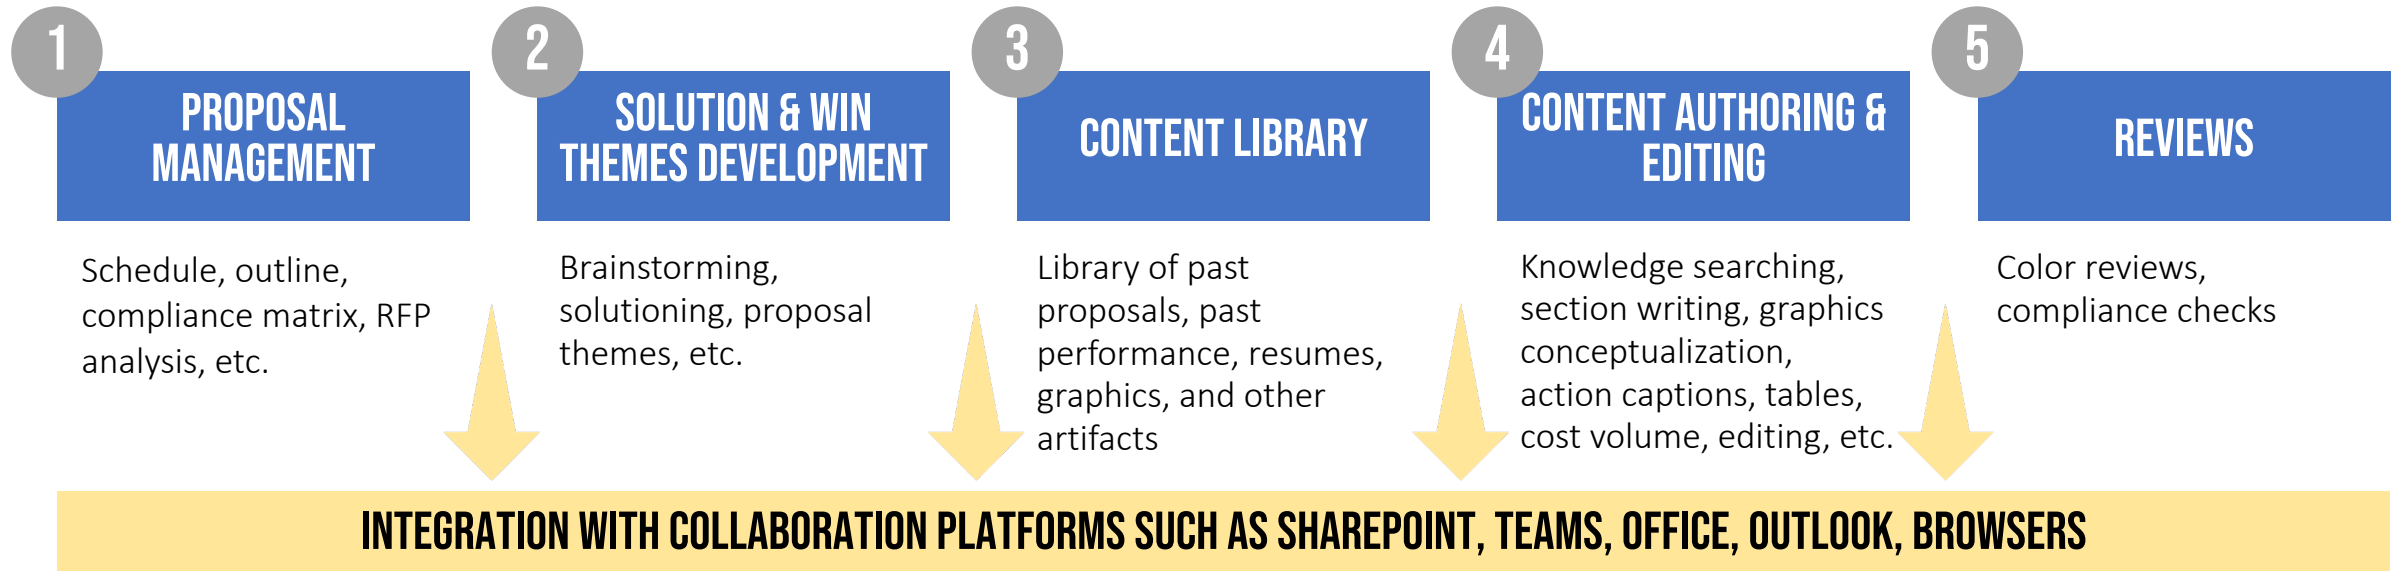

AI IS LIKE A HIGH-SPEED ARCHEOLOGIST DIGGING THROUGH YEARS OF PAST PROPOSALS UNEARTHING TREASURES AND TRANSFORMING THEM INTO HIGHLY RELEVANT CONTENT MUCH FASTER THAN A HUMAN COULD

Five Components of Successful AI Integration Into the Proposal Development Process

OST GLOBAL SOLUTIONS

Evolving Relationship of Human BD Expert and AI: Bloom's Taxonomy

OST GLOBAL SOLUTIONS

Human BD Expert

Produce new or original work

Review, justify a decision

Draw connections among ideas

Use information in new situation

Explain ideas or concepts

Recall facts and basic concepts

CREATE

EVALUATE

ANALYZE

APPLY

UNDERSTAND

REMEMBER

AI

Help design, assemble, author, develop, formulate, investigate

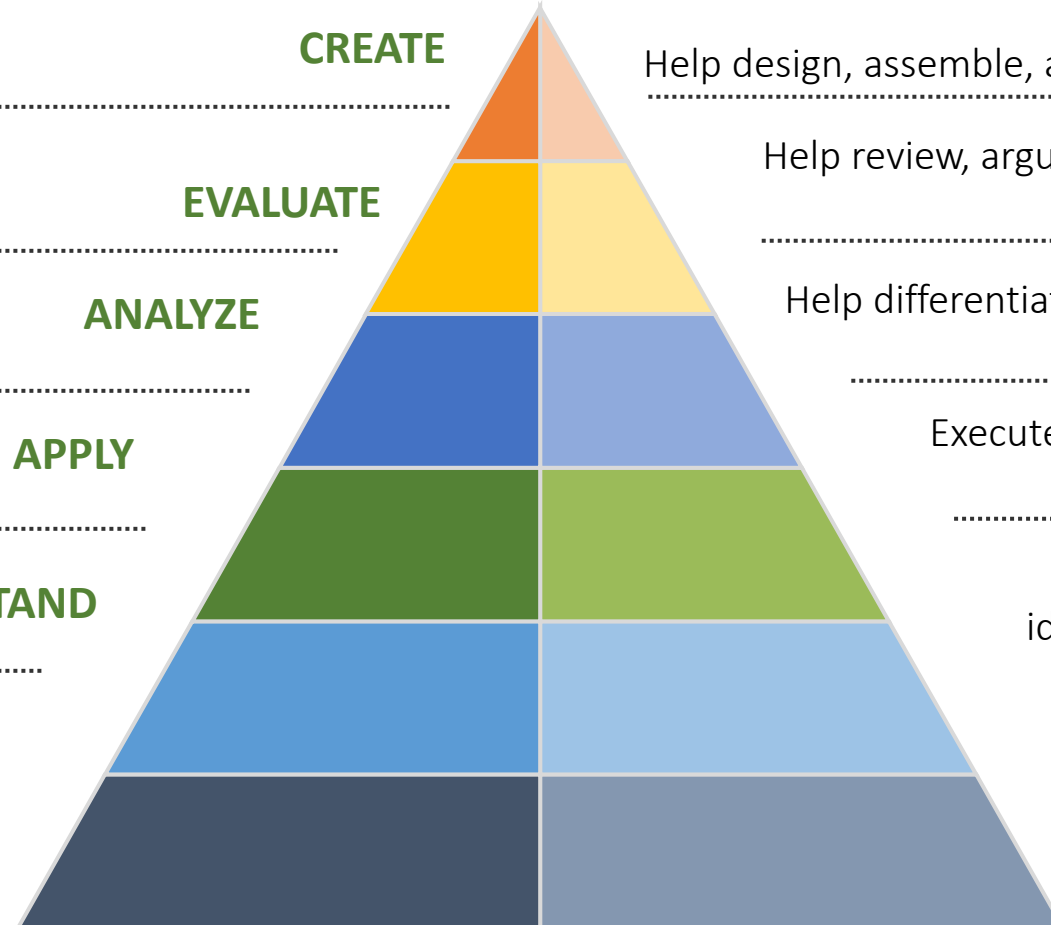

Help review, argue a point, defend, judge, select, value, support, critique, weigh

Help differentiate, organize, relate, compare, contrast, distinguish, experiment, question, test

Execute, implement, solve, use, demonstrate, interpret, operate, schedule, sketch

Classify, describe, discuss, explain, identify, locate, recognize, report, select

Define duplicate, list, memorize, repeat, state

AI Adoption Rates Per EY

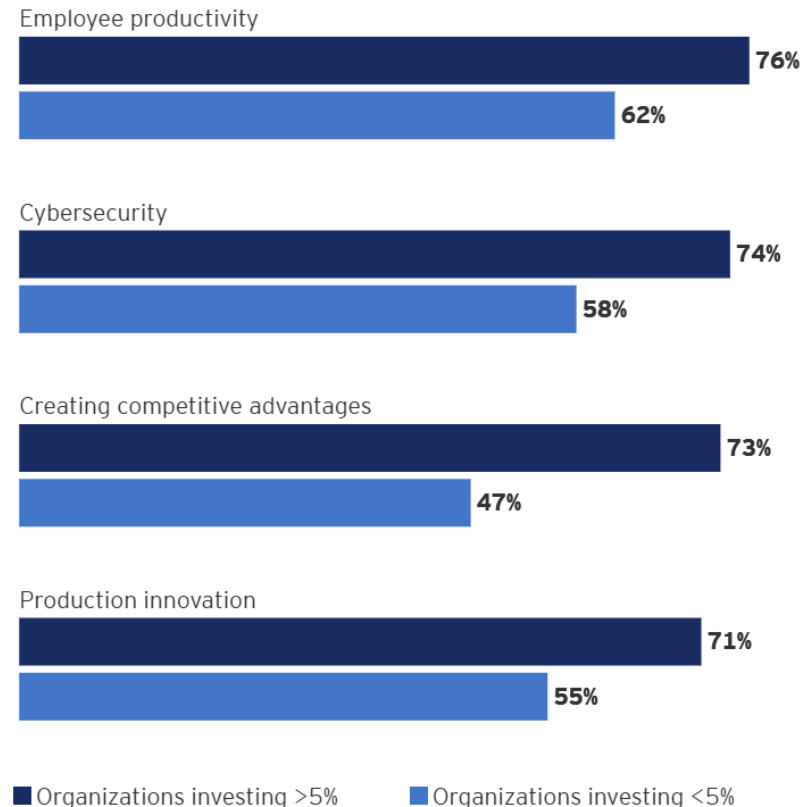

OST GLOBAL SOLUTIONS

- The “EY 2024 Work Reimagined Survey” highlights a significant rise in generative AI usage at work, increasing from 22% in 2023 to 75% across 27 industries globally.
- GenAI adoption is high in the tech sector (90%), while government and public sectors trail (60%).
- Generative AI is fast taking over the workplaces.
- Anyone hesitating will be left behind.
- Adoption involves expanding use cases and mastery of the tools and takes time.
- Those who start early will significantly outpace the competitors.

Investment matters - those **investing more than 5%** are **seeing increased returns** compared to those investing less than 5%

“Those who invest wisely in AI today will be the industry trailblazers of tomorrow.”

[Enterprise AI adoption key to corporate growth | EY - US](#)

About Artificial General Intelligence (AGI)

- AGI is a "Full AI," a machine with the ability to understand, learn, and apply its intelligence broadly across a wide range of tasks, similar to how a human being operates.
- AGI would have the capacity for general reasoning, problem-solving, and learning, such that it could be applied to any domain without being specially tailored for it.
- AGI does not yet exist and remains a theoretical concept although leaks show that progress was made.
- AGI is not just designed to perform specific tasks but is capable of understanding and acquiring knowledge in a generalizable and adaptable manner.
- Prior to that or simultaneously, there may be agents that are able to perform highly specialized tasks.
- The timeline for the development of AGI is uncertain, and there is a robust debate about the nature and implications of creating machines with general intelligence.
- The human elements of trust, empathy, and relationship-building are deeply ingrained in BD and will always require a human touch – work on your EQ and personal growth.

OpenAI Stages of Artificial Intelligence

OST GLOBAL SOLUTIONS

Level 1	Chatbots, AI with conversational language
Level 2	Reasoners, human-level problem solving
Level 3	Agents, systems that can take actions
Level 4	Innovators, AI that can aid in invention
Level 5	Organizations, AI that can do the work of an organization

"Levels of AGI: Operationalizing Progress on the Path to AGI": arXiv.org

OST GLOBAL SOLUTIONS

Performance (rows) x Generality (columns)	Narrow clearly scoped task or set of tasks	General wide range of non-physical tasks, including metacognitive tasks like learning new skills
Level 0: No AI	Narrow Non-AI calculator software; compiler	General Non-AI human-in-the-loop computing, e.g., Amazon Mechanical Turk
Level 1: Emerging equal to or somewhat better than an un-skilled human	Emerging Narrow AI GOFAI (Boden, 2014); simple rule-based systems, e.g., SHRDLU (Winograd, 1971)	Emerging AGI ChatGPT (OpenAI, 2023), Bard (Anil et al., 2023), Llama 2 (Touvron et al., 2023), Gemini (Pichai & Hassabis, 2023)
Level 2: Competent at least 50th percentile of skilled adults	Competent Narrow AI toxicity detectors such as Jigsaw (Das et al., 2022); Smart Speakers such as Siri (Apple), Alexa (Amazon), or Google Assistant (Google); VQA systems such as PaLI (Chen et al., 2023); Watson (IBM); SOTA LLMs for a subset of tasks (e.g., short essay writing, simple coding)	Competent AGI not yet achieved
Level 3: Expert at least 90th percentile of skilled adults	Expert Narrow AI spelling & grammar checkers such as Grammarly (Grammarly, 2023); generative image models such as Imagen (Saharia et al., 2022) or DALL-E 2 (Ramesh et al., 2022)	Expert AGI not yet achieved
Level 4: Virtuoso at least 99th percentile of skilled adults	Virtuoso Narrow AI Deep Blue (Campbell et al., 2002), AlphaGo (Silver et al., 2016; 2017)	Virtuoso AGI not yet achieved
Level 5: Superhuman outperforms 100% of humans	Superhuman Narrow AI AlphaFold (Jumper et al., 2021; Varadi et al., 2021), AlphaZero (Silver et al., 2018), StockFish (Stockfish, 2023)	Artificial Superintelligence (ASI) not yet achieved

- Progression towards AGI by examining both the depth (performance) and breadth (generality) of AI capabilities
- Levels from "No AI" to "Superhuman AI"
- Distinctions between narrow AI (focused on specific tasks) and general AI (capable of a wide range of tasks)
